RS485 4-in-1 Soil Moisture, Temperature, pH & EC Sensor

Buy now

SKU: SEN0604

This RS485 soil sensor measures temperature, humidity, EC, and pH. It has a 5-30V wide voltage supply, fast response, stable output, and automatic conductivity temperature compensation. With IP68 protection, 316 stainless steel probe (rust/corrosion-resistant), it's small, long-burial, and suitable for all soil types. Compatible with Arduino UNO R3 + TTL-to-485 board, widely used in agriculture (irrigation, greenhouses), rapid testing, etc.

Specification

Parameter	Details
Power supply voltage	DC5-30V
Power consumption	0.5W@24V

Parameter	Details
Output mode	RS485
Detection parameters	temperature, humidity，conductivity（EC）、PH
Humidity parameters	
Measuring range	0-100%
Resolution	0.1%
Accuracy	0-50%@±2%, 50-100%@±3%
Temperature parameters	
Measuring range	-40°C~+80°C
Resolution	0.1°C
Accuracy	±0.5°C
Conductivity (EC)	
Measuring range	0-20000us/cm
Resolution	1us/cm
Accuracy	0-10000us/cm@±3%FS, 10000-20000us/cm@±5%FS
Temperature compensation	memory temperature compensation, compensation range 0-50°C
Measuring range	0-50°C
PH	
Measuring range	3-9PH
Resolution	0.1PH
Protection level	IP68
Probe material	anti-corrosion special electrode
Sealing material	black flame retardant epoxy resin
Working temperature	-20°C~+60°C
Size	127x45x15mm
Cable length	2m

Dimensional Drawing

Pinout

Num	Label	Description
Brown line	VCC	Power input positive pole, DC5-30V power supply
Black line	GND	Power ground wire
Yellow line	485-A	RS485 data line A
Blue line	485-B	RS485 data line B
